List of Contents

NUMBER 1

Sang Soon Lee	1	Boundary element evaluation of stress intensity factors for interface edge cracks in a unidirectional composite
V. V. Loboda	7	The problem of an orthotropic semi-infinite strip with a crack along the fixed end
G. B. Sinclair, T. W. Messner and **G. Meda**	19	Stress intensity factors for deep edge cracks in bending
Weisheng Lei and **Mei Yao**	25	The simplified determination of drop-weight-test NDT
V. M. Sglavo and **D. J. Green**	35	The sub-critical indentation fracture process in soda-lime–silica glass
A. T. Yokobori, Jr, T. Nemoto, K. Satoh and **T. Yamada**	47	Numerical analysis on hydrogen diffusion and concentration in solid with emission around the crack tip
J. D. Lee, H. Liebowitz and **Kung-Yan Lee**	61	The quest of a universal fracture law governing the process of slow crack growth
Sung Ho Kim, Kang Yong Lee and **Moon Bok Park**	85	Mode II stress intensity factor for layered material under arbitrary shear crack surface loading
G. Marci	95	The ΔK_{eff}-concept: a unique and complete description of fatigue crack propagation
D. N. Lal	115	A detailed physical analysis of the R-effect on LEFM fatigue crack growth—I. On the combined roles of critical zones, LEFM parameters and stress ratio
Zhou Li	133	A new technique for determining fracture toughness K_{IC} and its confidence with single DCB specimen
Han Xue-Li and **Wang Duo**	139	The crack problem of a fiber–matrix composite with a nonhomogeneous interfacial zone under torsional loading—II. A ring-shaped crack in the matrix
		Technical Notes
N. T. Younis and **J. Mize**	147	Discrete averaging effects of a strain gage at a crack tip
Guang-Xu Cheng, Jian-Zheng Zuo, Zhi-Wen Lou and **Zhen-Bang Kuang**	155	Continuum damage model of low-cycle fatigue and fatigue damage analysis of welded joint
	i	Software Survey Section

NUMBER 2

E. Papa and A. Taliercio	163	Anisotropic damage model for the multiaxial static and fatigue behaviour of plain concrete
Yinyan Wang and Fu-Pen Chiang	181	Deformation fields of interfacial cracks in adhesively bonded DCBs
H. S. Kit, M. V. Khaj and V. V. Mykhas'kiv	191	Analysis of dynamic stress concentration in an infinite body with parallel penny-shaped cracks by BIEM
C. A. Sciammarella and O. Combel	209	An elasto-plastic analysis of the crack tip field in a compact tension specimen
T. Huang and G. C. Li	223	Numerical analyses for the material bifurcation in plane sheet under tension
M. Vijaya Babu, R. Krishna Kumar, O. Prabhakar and N. Gowri Shankar	235	Fracture mechanics approaches to coating strength evaluation
H. Q. Zhang, F. Delale and B. M. Liaw	249	Interface and matrix fracture in brittle fiber-reinforced composites
S. Aoki, Y. Moriya, K. Kishimoto and S. Schmauder	275	Finite element fracture analysis of WC–Co alloys
D. N. Lal	289	A detailed physical analysis of the R-effect on LEFM fatigue crack growth—II. On the combined roles of growth mechanisms and stress ratio
J. Schijve	313	Some calculations on the stress distribution in an infinite sheet with a single crack and with periodic collinear cracks
T. N. Bittencourt, P. A. Wawrzynek, A. R. Ingraffea and J. L. Sousa	321	Quasi-automatic simulation of crack propagation for 2D LEFM problems
		Technical Note
K. Badari Narayana and B. Dattaguru	335	Certain aspects related to computation by modified crack closure integral (MCCI)
	i	Software Survey Section

NUMBER 3

J. Schijve	341	Some considerations on the Eftis–Liebowitz equation for the COD compliance of a center cracked sheet specimen
Zhang Zheng and **Zhang Xing**	347	Fracture mechanics analysis of warm pre-stressing for power-hardening materials
Y. Z. Chen and **N. Hasebe**	355	Dependence of stress intensity factor on loading condition
M. E. M. El-Sayed, T. Stawiarski and **R. Frutiger**	363	Fatigue analysis of spot-welded joints under variable amplitude load history
M. Konsta-Gdoutos	371	Limitations in mixed-mode stress intensity factor evaluation by the method of caustics
Tianxi Tang, Z. P. Bažant, Sungchul Yang and **D. Zollinger**	383	Variable-notch one-size test method for fracture energy and process zone length
A. N. Das	405	Tearing of an elastic wedge—I
A. N. Das	413	An elastic wedge with an extending crack—II
S. Davidson	425	The steady linear thermoelastic problem for a circular hole with two radial edge cracks of unequal length
Weisheng Lei and **Mei Yao**	439	The generalized characteristic transition temperature of brittleness—II. Thermal activation analysis
M. V. Lysak	443	Development of the theory of acoustic emission by propagating cracks in terms of fracture mechanics
N. T. Nguyen and **M. A. Wahab**	453	The effect of undercut and residual stresses on fatigue behaviour of misaligned butt joints
Shiwen Wang, Wanlin Guo and **Yapen Shen**	471	Effects of three-dimensional constraint on cracks on bimaterial interfaces
L. Parnas, Ö. G. Bilir and **E. Tezcan**	485	Strain gage methods for measurement of opening mode stress intensity factor
A. T. Yokobori, Jr and **T. Yokobori**	493	Comparative study on characterization parameters for high temperature creep crack growth with special emphasis on dual value behaviour of crack growth rate
P. W. Tan, J. C. Newman, Jr and **C. A. Bigelow**	505	Three-dimensional finite-element analyses of corner cracks at stress concentrations
	i	Software Survey Section

NUMBER 4

I. V. Papadopoulos and V. P. Panoskaltsis	513	Invariant formulation of a gradient dependent multiaxial high-cycle fatigue criterion
A. Seweryn and **K. Molski**	529	Elastic stress singularities and corresponding generalized stress intensity factors for angular corners under various boundary conditions
B. D. Davidson, R. Krüger and M. König	557	Effect of stacking sequence on energy release rate distributions in multidirectional DCB and ENF specimens
T. Fett	571	Determination of residual stresses in components using the fracture mechanics weight function
S. S. Lee and **T. H. Kim**	577	Singular cladding stresses at interface of elastic cylinders
C. Y. Tang, W. H. Tai and W. B. Lee	583	Modeling of damage behaviors of high impact polystyrene
Qi-Zhi Wang	593	The crack-line (plane) stress field method for estimating SIFs—a review
M. B. Heinimann, M. T. Doerfler and A. F. Grandt, Jr	605	Analysis of cracks at deep notches
Yanghu Mou and R. P. S. Han	617	Influence of damage in the vicinity of a macrocrack tip
M. Terheci	633	Fracture toughness of commercially sintered low alloy steels—Part I. Theoretical background and experimental
M. Heinzelmann	647	Singular thermal stress fields in brazed three-layer joints
Feng-Lei Huang and Ze-Ping Wang	657	Modelling fracture process in a ductile solid under intense impulsive loading using a model of the void growth with temperature-dependency
		Technical Notes
D. Radaj and **S. Zhang**	675	Stress concentration at fictitiously rounded sharp notches in shear loading
M. Lambrigger	677	Master curve for brittle cleavage fracture toughness testing
H. Abe	679	Crack growth of carburized materials due to thermal striping in sodium
Li Xiaoyan, Zhu Hongguan and Tian Xitang	689	A study of fatigue crack growth and crack closure in mechanical heterogeneous welded joints
	i	Software Survey Section

NUMBER 5

Xing Xiu-San	699	On theoretical framework of nonequilibrium statistical fracture mechanics
Wang Yue-Sheng and **Wang Duo**	717	Transient motion of an interface dislocation and self-similar propagation of an interface crack: anti-plane motion
R. Alex and **L. Schovanec**	727	An anti-plane crack in a nonhomogeneous viscoelastic body
Fulin Shang, Zikun Wang and **Zhonghua Li**	737	Thermal stresses analysis of a three-dimensional crack in a thermopiezoelectric solid
K. Tanaka, Y. Akiniwa and **K. Shimizu**	751	Propagation and closure of small cracks in SiC particulate reinforced aluminum alloy in high cycle and low cycle fatigue
Jin-Chao Yue and **Ren-Ji Tang**	763	Integral equation method for the torsion of a composite cylinder with crack and inclusion
Y. J. Chao and **S. Yang**	777	Higher order crack tip fields and its implication for fracture of solids under mode II conditions
I. S. Jones and **M. W. J. Lewis**	795	An impulse response model for the prediction of thermal striping damage
M. Chiarelli, A. Frediani and **M. Lucchesi**	813	Computation of crack extension energy rate for elastic–plastic hardening materials under variable loading
A. D. Dimarogonas	831	Vibration of cracked structures: a state of the art review
		Technical Notes
T. Fett and **G. Thun**	859	Residual stresses in PVC-cylinders determined with the weight function method
Hung-Kuk Oh	865	Determination of fracture toughness by uniaxial tensile test

NUMBER 6

J. H. Kuang and **Y. C. Chen**	869	The values of J-integral within the plastic zone
M. A. Magill and **F. J. Zwerneman**	883	Sustained Mode I and Mode II fatigue crack growth in flat plates
H. Drar	901	Fracture mechanisms near threshold conditions of nickel alloyed PM steel

N. Ait Hocine, M. Nait Abdelaziz, H. Ghfiri and **G. Mesmacque**	919	Evaluation of the energy parameter J on rubber-like materials: comparison between experimental and numerical results
D. Bardzokas, G. E. Exadaktylos and **G. Anastaselos**	935	The effect of stringers and patches on the stress intensities around cracks in plates
V. Tamuzs, V. Petrova and **N. Romalis**	957	Plane problem of macro–microcrack interaction taking account of crack closure
J. Qian and **A. Fatemi**	969	Mixed mode fatigue crack growth: a literature survey
M. M. El-Hawary and **S. A. Hamoush**	991	Bond shear modulus of reinforced concrete at high temperatures
M. Oriunno, A. Frediani and **A. Lazzeri**	1001	Influence of the constitutive characteristics of resins on the composite materials delamination
K. Y. Lee and **J. S. Kim**	1013	Determination of stress intensity factor for embedded elliptical crack in turbine rotor
	1031	Corrigendum
	I	Index to Volume 55
